REMARKS

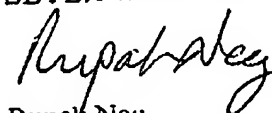

In the Final Office Action (and reasserted in the Advisory Action), the Examiner has rejected claims 1-20 under 35 U.S.C. § 103(a) as being unpatentable over *Tushie* in view of *Morris* (U.S. Patent Publication No. 2004/0078227 A1).

The passages relied on by the Examiner from the *Morris* application publication (e.g., paragraphs [0038], [0060], [0098], [0102], and [0120]) are not present in the *Morris* provisional application (Appl. No. 60/381,058). In paragraph 9 of the continuation sheet attached to the Advisory Action, the Examiner relies on the provisional application filing date of May 15, 2002 and argues that pages 6, 7, 10, and 29 and Figure 9 of the provisional application support the Examiner's §103(a) rejection. Thus, the Examiner asserts that the content from these pages of the provisional application is equivalent to the content from the *Morris* published application and that it describes the same limitations as described in the published application initially relied on by the Examiner. Applicant has examined the content of pages 6, 7, 10, and 29 and Figure 9 from the provisional application and finds that the content therein fails to support the Examiner's §103(a) rejection.

Applicant respectfully requests that the Examiner withdraw the §103(a) rejections based on the *Morris* references because each fails as a prior art reference for the obviousness rejection and requests that a Notice of Allowance be issued.

Applicant believes that all pending claims are allowable and respectfully requests a Notice of Allowance for this application from the Examiner. Should the Examiner believe that a telephone conference would expedite the prosecution of this application, the undersigned can be reached at the telephone number set out below.

Respectfully submitted,
BEYER WEAVER LLP
